DETAILED ACTION

STATEMENT OF REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: Neither Inou et al. U.S. Patent 5,289,500 nor Nishio U.S. Patent 5,769,697 expressly disclose programming a processor to divide the pressure range by the value of a component resolution. The allowability, at least in part, resides in the fact that neither reference teaches an apparatus for chemical mechanical polishing that comprises a processor programmed to divide the pressure range by the value of a component resolution to define scale portions of the pressure range; the processor being programmed to generate a first output signal to identify one of the scale portions that includes the desired value; and the processor being programmed to generate a second output signal to identify a set point that defines the requested value in the identified scale portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
